

Practice Planner

Appointment Management and Billing System.

Are you tired of using pencil and paper to manage your appointments?

Sick of not being able to use that expensive computer you have on your desk?

Practice Planner is an **easy to use** software program that will help you manage your day to day appointment setting, billing, and client contact details. An example Diary Booking Screen is shown below.

Features of Practice Planner include:

- Single Practice Appointment Management System
- Ability to manage appointments for up to five practitioners with their own working schedules in the one Practice
- Recording of Individual practitioner working and contact information
- Recording of client appointment details
- Treatment Billing and Receipting
- Reporting capability for financial client (payment) and outstanding payment tracking
- System Backup/Restore (available in the fully registered version only)

DNA Programming is able to customise **Practice Planner** to suit the individual needs of your individual practice.

For a **FREE 30 day evaluation copy** of Practice Planner, check us out at:
